SKILLS/TOOLS

-• Java • C • DBMS • Android
development • Flutter • Dart • Figma •
Firebase • Kotlin • HTML • CSS • Git
• qwiklabs • AWS • Graphic Designing
, GCP • Augmented Reality Enthusiast

COURSEWORK

- Data Structures and Algorithms
- Object Oriented Programming
- Operating Systems
- Computer Networks
- Software Engineering
- Android development
- DBMS

ACTIVITIES

PARTICIPATION

- Google Cloud Ready Program
- 30 days of Google Cloud (Un Facilitator)
- Goldman Sachs Engineering
Virtual Program

MENTOR

- Mentored students at Codonfest
Competitive Programming Fest

AMBASSADOR

- Ambassador at SkillStruct University
London, UK
- Delhi Chapter Lead at
Skillship Foundation

PROJECTS

AIRLINE MANAGEMENT SYSTEM | JAVA

- This project is an attempt to stimulate the basic concepts of "AIRLINE RESERVATION SYSTEM".
 - This system follows a simple process which allows the passenger to check availability of flights by entering the two travel cities.

INSTAGRAM CLONE APPLICATION | ANDROID, KOTLIN

- Made an Instagram Clone application, implemented very similar features like post, story, following, followers, notifications and your profile section.
- Technology used: Kotlin (Android), Firebase, Git

PREDICTION AND ANALYSIS | PYTHON

- Used Fbprophet library to easily predict future time series data without wasting much time on tuning the model

BANKING APPLICATION | ANDROID, JAVA

- Created a Banking Application which kept track of it's user and their transaction history.

WORLD TIME APPLICATION | FLUTTER

- Created a World time Application which shows the time of different countries, data fetched from an API
